

SDBIF FRIENDRAISER

ARTIST PROFILE

MICKY SCHAEFER

Micky Schaefer is a survivor of a traumatic brain injury sustained just prior to her second year in Medical School at UC, Irvine, during the Summer of 1992. She spent almost 7 months in a coma, and a total of 11 months in the hospital. Though she was never able to return to Medical School, she rediscovered her life-long love for creating amazing art.

With her tremendous determination, and the help of her family and SDBIF, every day advances her journey to recovery. Her incredible artistic talent has given her new purpose in life through her creations, and SDBIF is honored to have them shown at the Friendraiser!
